Forward Deployed Engineer JD [Fresher]

We are looking for high-potential Full Stack Developer freshers who are eager to build real-world, scalable applications using modern technologies.

This role is ideal for someone who:

- Has strong fundamentals in programming and web development
- Is excited to work on AI-powered products used at scale
- Is willing to learn fast and ship production-ready code early in their career

You will work closely with experienced engineers to build frontend interfaces, backend APIs, and cloud-native applications powering our Voice AI platform.

Key Responsibilities

- Design, develop, and maintain backend systems using Python frameworks (Flask, FastAPI, Django, or similar)
- Work on integrations with APIs, databases, and external services
- Write effective prompts and work with Generative AI models for real-world use cases
- Build and maintain systems using MongoDB and Redis for storage, caching, and workflow orchestration
- Collaborate with AI/ML teams to deploy LLM-powered applications
- Debug, optimize, and ensure reliability and scalability of backend systems
- Implement best practices for code quality, testing, and documentation

Required Skills & Qualifications

- Bachelor's degree in Computer Science, IT, or related field

Strong fundamentals in:

- Data Structures & Algorithms (basic level)
- Object-Oriented Programming
- Web Development (HTML, CSS, JavaScript)
- Academic projects / internships in full stack development preferred
- Good problem-solving ability and willingness to learn

About Gnani.ai

Gnani.ai is a Gen AI-based startup that is working on voice and chat-based solutions for large businesses. Gen AI is the biggest innovation disrupting the market, and we are at the heart of this disruption. Funded by one of the largest global conglomerates in the world and backed by a number of market leaders in the tech industry, Gnani.ai aims to empower enterprises with Gen AI-based speech technology.

We are working with some of the largest companies in banking, insurance, e-commerce, and financial services, and we are not slowing down. With aggressive expansion plans, Gnani.ai aims to be the leader in the global market for agentic solutions.

We are proud to share that Gnani.ai has been selected by the Government of India as one of the AI companies entrusted with building the nation's first Voice-to-Voice Foundation Model, a landmark initiative underlining our commitment to building sovereign AI infrastructure for India.

Gnani.ai is building the future of customer experience and agentic solutions. If you are fascinated by Gen AI and want to work on the latest technologies in a high-intensity, fast-growing, flexible work environment with immense growth opportunities, come and join us. We are looking for hard workers who are ready to take on big challenges
